OV GROUP is the Energy Service Company originally created by UniCredit in JV with WWF.

In the last three years of activity has arranged energy efficiency operations with investments of about 100 M€ and has consolidated a high level of competence and know-how in energy efficiency for key sectors of the economy such as real estate, infrastructure, mass market retailers, industrial and manufacturing, sport and smart cities, becoming the strategic partner of several organizations for energy investments. OV GROUP operates as management company for technical and financial arrangements with the aim of developing and structuring “green economy” investment operations.

OV GROUP green business model allows supporting a wide range of activities in the energy sector: energy assessment, green engineering, investments arrangement, due diligence, technical plant construction, monitoring and environmental certification.

OV GROUP is a UNI CEI 11352 certified ESCo and has developed a unique know-how with a highly advanced technical-financial approach that always combines analysis, green technologies and environmental impact evaluation.

OV GROUP is advisor for Smart Cities EU Projects focusing on the economic and financial sustainability assessment of technologies in the Energy Efficiency sector.

---

MANNI ENERGY is the commitment of Manni Group in clean energy and wants to be a partner at 360° which supports the customer in all phases that lead to the construction of a renewable energy system.

MANNI ENERGY is a company owned by Manni Group SpA. The entrance of Manni Group in the renewable energy market represents the union of the various experiences gained in over 60 years of presence on the market of construction both nationally and internationally. During these years, the Group made several interventions and technically complex projects in the construction of large photovoltaic systems in public, industrial, commercial, agricultural and zootechnique contexts.

The Group, with a turnover of over 500 M€, carries out activities in the steel industry and in the business of pretreated steel elements, components and structural systems for buildings and installations in various sectors.

Manni Group means also production of insulated panels for roofs and walls.

SUSTECH is a company that operates in the energy sector, offering technical consultancy for solutions in the sector of energy efficiency and production processes upgrading.

SUSTECH was established in 2009 by combining the expertise of IT professionals with the experience of thermal and electrical engineering. A new reality that always bases its activities on its three founding principles: responsibility, sustainability and innovation.

Today SUSTECH is able to provide energy services to both private and large companies ensuring the whole process from engineering to installation of the systems.

Therefore, SUSTECH operates as *energy consulting company*, offering integrated solutions that, through the reorganization of production processes and the introduction of innovative technologies, allow to drastically reduce energy costs, waste and harmful emissions; as *EPC contractor*, providing solutions and systems in a “turn key” mode managing all the construction stages; as *technical provider*, supporting companies in the electricity and heat sector in the design and installation of the systems.

SUSTECH is also an Energy Service Company.
